# Nobelox MD®

Developed by SK9 Laboratories

We are a boutique company, dedicated to creating advanced, medical-grade skincare products designed to improve overall skin quality and address the most common signs of skin aging. By combining medical principles and a scientific approach to every stage of product development, we offer tailored solutions that harness the power of the most potent active ingredients, leading to measurable improvement in the appearance of the skin for transformative results.

Our approach to product development:

- **Proven Actives:** We use high-quality, proven-to-work active ingredients in optimal combinations and concentrations along with smart delivery systems.
- **Advanced Formulas:** Our minimalistic yet advanced formulas ensure optimal skin biocompatibility and bioavailability, emphasising simplicity and effectiveness.
- **Clean Ingredients:** We say no to unnecessary and harsh ingredients. We do not use parabens, mineral oil, formaldehyde or formaldehyde releasers among others.
- **Small Batch Production:** To ensure product integrity and freshness.

Our products are designed and manufactured in the UK. Each of them caters to all skin types and tones, and are suitable for vegans and vegetarians.

We do not perform any kind of animal testing, we do not use animal derived, irritating or harsh ingredients that offer no benefit to the formulas and can compromise the integrity of the skin.

## Hybrid Vitamin C Serum

**Nobelox MD®**  
Developed by SK9 Laboratories

Our revolutionary, hybrid serum: a potent and stable, clinical-grade, antioxidant formulation, meticulously crafted to visibly transform your skin. Harnessing the power of two, cutting-edge forms of Vitamin C, this waterless serum can breathe new life into your complexion, fighting dullness and discolouration, restoring a youthful glow and radiance, while effectively reducing the appearance of fine lines and wrinkles. Enriched with Vitamin E for enhanced antioxidant protection, our serum is the ultimate solution for achieving luminous, healthy-looking skin.

### Key benefits

- Suitable for all skin types and shades
- Innovative formula with two stable forms of Vitamin C
- Gentle on the skin
- Non-greasy, light and velvety texture
- Up to 2 months of usage
- Made in the UK

### How it works

- Vitamin C supports natural collagen production for firmer and more elastic skin, while reducing the appearance of lines and wrinkles.
- Vitamin C enhances skin brightness, supports a more uniform tone and works to reduce the appearance of dark spots and discolouration.
- Vitamin C and Vitamin E work in synergy to offer protection from environmental aggressors, oxidative stress and photo-aging. Jojoba oil, squalane and triglycerides, which are skin-identical emollients, moisturise and soften the skin while supporting the efficient delivery of Vitamin C.

### Results

With consistent use, skin will appear more radiant with a vibrant healthy glow, while dark spots will appear lessened for a more even tone. Lines and wrinkles will appear diminished and the skin will look firmer.

### Why it's special

Our serum is based on a sophisticated biphasic platform, which guarantees maximum potency, skin compatibility and efficacy, while reducing the chances of irritation despite the high content of Vitamin C.

## Advanced Corrective Concentrate

**Nobelox MD®**  
Developed by SK9 Laboratories

Experience the power of our concentrated, intensive topical treatment designed to combat the appearance of fine lines and wrinkles. Consisting of a highly effective blend of peptides it helps you achieve a significantly more refined and youthful complexion, targeting areas where it's needed most. A versatile product that can be integrated in any routine either as a standalone intensive line and wrinkle treatment, or as a booster.

### Key Benefits

- Suitable for all skin types and shades
- Expertly designed clinical-level formula working to reduce the appearance of lines and wrinkles
- Easily integrated into your existing routine either as a standalone product or as a booster
- Made in the UK

### How it works

- 4 types of Hyaluronic Acid support enhanced skin volume and density.
- Biomimetic matrikine peptides work by stimulating the production of essential skin components such as elastin, collagen and hyaluronic acid for intensive skin repair and regeneration.
- Neuropeptides work to reduce the appearance of expression lines as a result of repetitive contractions.

### Results

With consistent use, fine lines and wrinkles appear diminished and skin appears more refined.

### Why it's special

When developing the concentrate, we wanted a versatile product that could offer amazing results both on its own but and as part of your existing routine, without the need to replace any product within your current regimen. The gel form allows easy and precise application focusing on key facial areas.
